FASHION

PHOTOGRAPHY *my way*

I am taking you through fashion style inspired through creative art and different culture with in the variety of aspect of with in the fashion world. Fashion has been a inspiration i wanted to venture into since a young age, being creative by taking new mordenstyle and mixing it with vintasge style usally known as thrift shopping.

It all started in 2017 when my brother reminded me about the drawing and creative arts that I used to do when I was young. But it was true when I thought about It when I started thinking about doing design as a course or career to choose but before I actually took a decision to do it I took a short course on Shaw academy online. And I did well without having any background.

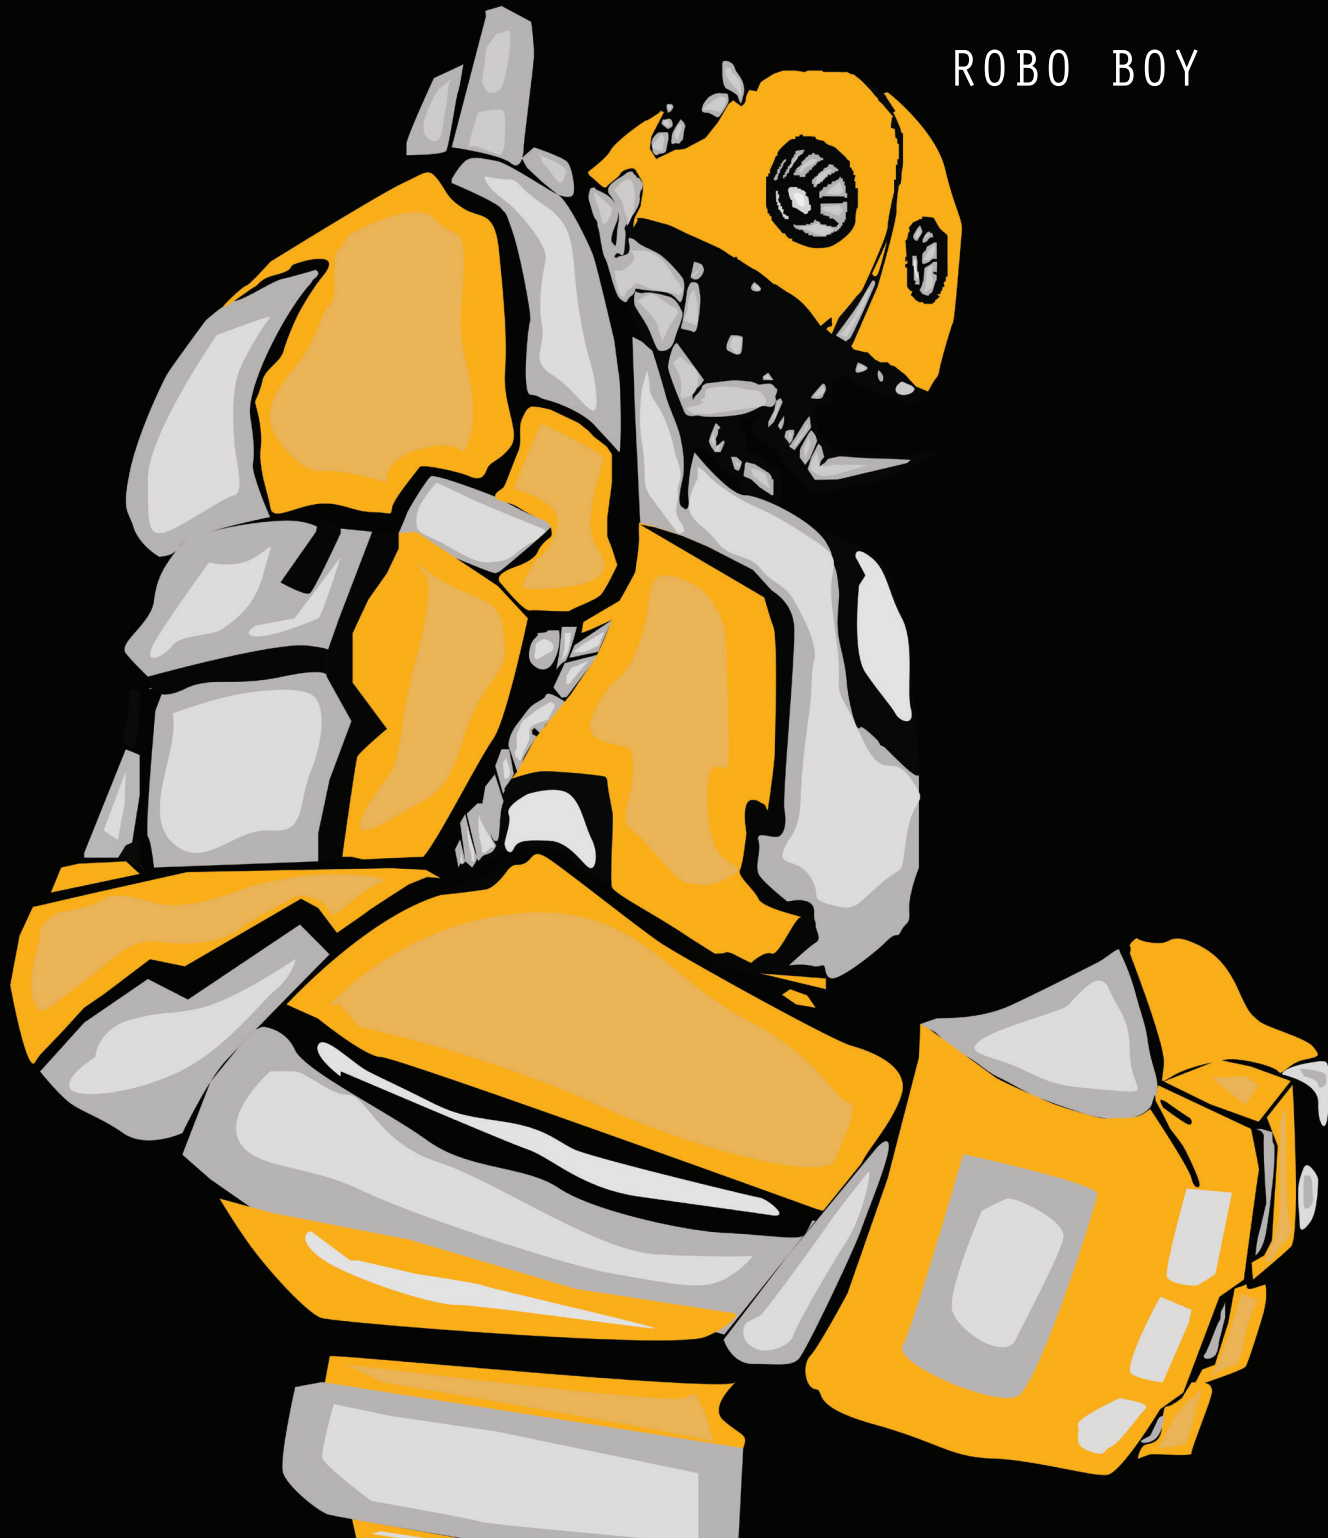

After coming to Cape Town I saw a lot of fashion and artistic culture in the mother city which I became part of I started doing photo shoots for friends and it all started to becoming a skill I developed to mixing my graphic creativity with fashion and the street culture of dressing up in cape town. From there on I bought I sketch book but the moment I started drawing on at the book I saw disappointing results and I actually stopped for about a week and looked for inspiration and researched about what is graphic design why do we need it and how does it apply to everyday life after that I actually started drawing and having more time.
